

3rd & 4th Avenues & Center Street Bike Lane Projects

OPEN HOUSE

The City of Rochester desires to improve access to downtown for all street users, including pedestrians, bicyclists, transit riders, and motor vehicle drivers. The City is currently implementing on-road bike facilities along 3rd & 4th Avenues and Center Street.

Your input is important to City officials to understand current downtown cycling needs. Brief presentations will be held at 4:30 pm and 5:15 pm, and drop ins are welcome.

Thank you for your participation!

If you have any questions about the project, please contact
